

AI-powered observability that drives resilience and innovation

Discover how Dynatrace and Microsoft deliver the tools you need to reimagine business and achieve greater goals.

Several key challenges are slowing adoption

As organizations push to deliver resilient software and reliable AI faster and more securely, observability plays a critical role in removing technical barriers to production. Yet adoption is often slowed by persistent challenges around accuracy, measurement, and data management—gaps that directly impact developers’ ability to move AI-driven initiatives forward.

Build a deeper understanding of your business with Dynatrace and Microsoft

Unlock the full potential of the cloud and transform your enterprise with Dynatrace, an AI-powered observability platform built for Microsoft Azure. Dynatrace and Microsoft work together to help organizations unlock operational efficiency through deep insights and automation.

Optimize efficiency and productivity without sacrificing security

Organizations are modernizing development workflows with CI/CD to build, release, and update applications faster, but adding security into these pipelines can slow teams down. The Dynatrace MCP Server Integration with GitHub Copilot helps streamline development by enabling developers to build, remediate, and release applications quickly and more efficiently.

How it works:

- 

1 Prioritize what matters with runtime enriched vulnerability context
- 

2 Autogenerate fixes using GitHub Copilot and Dynatrace insights
- 

3 Automate remediation across pipelines and GitHub Actions
- 

4 Detect, visualize, and verify the impact of vulnerabilities using Runtime Vulnerability Analytics

Bring clarity and control to cloud workloads with Dynatrace and Microsoft

Optimize cloud workloads with AI-powered observability from Dynatrace and Microsoft.
